THE EXPERIENCE

By air & along the coast

Your helicopter journey

Travel to Pleasant Bay takes approximately 1 hour and 15 minutes each way. The smaller Bell 206 requires a 15-minute refuelling stop at Port Hawkesbury on each leg.

The first and third legs of this adventure are by helicopter, either a Bell 206 Long Ranger or Sikorsky S-76A++ depending on the group size.

Each helicopter has clear viewing windows and is strictly maintained and flown by a captain with 30 years experience.

Your Zodiac adventure

The second leg of this adventure is along the rugged shores of the Cape Breton Highlands by high powered Zodiac. They are powered by twin motors, which provide extra safety and make for an exhilarating ride.

The Zodiacs are equipped with a hydrophone, which enables us to hear the whales sing underwater (when conditions permit). Seasickness is less likely on these types of vessels, since the pontoons help prevent the rolling motion that you normally get on a regular boat. Due to their flat bottom design, we can get very close to shore to view our spectacular rock formations and waterfalls. We'll also search for whales such as Pilot, Finback, Minke and Humpback as well as dolphins, seals, and numerous seabirds.

Before you depart

You are not required to register with the park, whale interpretive centre or zodiac charter company as we look after all of those details on your behalf.

Please ensure to complete the required registration/waiver form that all visitors must complete, via the link provided in your email.

Lunch is provided but it never hurts to bring snacks and you should absolutely bring a water bottle. If you have any questions in the meantime, feel free to call or email us any time. We will be in touch closer to our departure regarding weather and landing conditions.
